SUBJECT INDEX

Acidity
XPS investigations of acid–base interactions in adhesion. Part 3. Evidence for orientation of carbonyl groups from poly(methylmethacrylate) (PMMA) at the PMMA–glass and PMMA–SiO_2 interfaces 393
Adsorbate
XPS study of mica surfaces 289
AES
Accurate determination of Auger line shape binding energies 117
An angle-resolving cylindrical mirror analyser for measurements of photo- and Auger electrons 379
Aerosol
Real-time investigation of aerosol particle beams using X-ray photoemission spectroscopy 327
Ag(111)
Extra-atomic relaxation in surface systems 355
Al(111)
Extra-atomic relaxation in surface systems 355
Anisotropy
The velocity distribution of photoelectrons at threshold derived from classical linear momentum conservation 177
Anode
Interference of Ag L radiation in the XPS of Si and Au using an Al/Mg twin anode 283
ARAS
An angle-resolving cylindrical mirror analyser for measurements of photo- and Auger electrons 379
ARES
An angle-resolving cylindrical mirror analyser for measurements of photo- and Auger electrons 379
ARUPS
Ultraviolet photoelectron spectroscopy with energy-resolved imaging 311
Auger
Accurate determination of Auger line shape binding energies 117
Inelastic electron background function for ultraviolet photoelectron spectra 253

Background
Inelastic electron background function for ultraviolet photoelectron spectra 253
Basicity
XPS investigations of acid–base interactions in adhesion. Part 3. Evidence for orientation of carbonyl groups from poly(methylmethacrylate) (PMMA) at the PMMA–glass and PMMA–SiO_2 interfaces 393
Binding energy
Electrostatic and chemical bonding contributions to the cation core level binding energy shifts in MgO, CaO, SrO, BaO. A cluster model study 189

Calcium ion
X-ray photoelectron spectroscopy of calcium-ion-implanted titanium 347
Calibration
Calibration of electron spectrometers by using ^{99m}TC internal conversion electron sources 31
Carbonyl
XPS investigations of acid–base interactions in adhesion. Part 3. Evidence for orientation of carbonyl groups from poly(methylmethacrylate) (PMMA) at the PMMA–glass and PMMA–SiO_2 interfaces 393
Cascade
Inelastic electron background function

for ultraviolet photoelectron spectra 253
Catalyst
XPS studies of oxidic model catalysts: internal standards and oxidation numbers 91
Cation
Electrostatic and chemical bonding contributions to the cation core level binding energy shifts in MgO, CaO, SrO, BaO. A cluster model study 189
CES
Relativistic calculations of photoelectron and conversion-electron spectra for UF_4 409
Chalcogenide
Electron energy loss and X-ray photoelectron spectroscopic studies of $NbSe_3$ 171
Charging
Accurate determination of Auger line shape binding energies 117
Cluster
Electrostatic and chemical bonding contributions to the cation core level binding energy shifts in MgO, CaO, SrO, BaO. A cluster model study 189
Co-ordination
An XPS study of yttria-stabilised zirconia single crystals 1
High resolution monochromated X-ray photoelectron spectroscopy (XPS) studies on novel biodegradable poly(ortho esters) prepared using *N*-methyl- and *N*-phenyldiethanolamine, correlated with binding energies obtained from ab initio molecular orbital methods 221
Concentration depth profile
Investigation of concentration depth profiles by means of angle-resolved XPS: a polynomial model 43
Core hole
Experimental and theoretical study of the XPS core levels of gas phase acetonitrile, acrylonitrile and propionitrile. Model molecules for polyacrylonitrile 239
Crystallinity
XPS study of polymer chain conformation in amorphous and crystalline poly(ethylene terephthalate) samples 53

DC-Xα
Relativistic calculations of photoelectron and conversion-electron spectra for UF_4 409
Dichloroethylene
Observation of many-body states in the valence shells of *cis*-, *trans*- and isodichloroethylene by synchrotron radiation photoelectron spectroscopy at 120 eV 75
Distortion
Calibration of electron spectrometers by using ^{99m}Tc internal conversion electron sources 31
DOS
Electron energy loss and X-ray photoelectron spectroscopic studies of $NbSE_3$ 171
Partial densities of valence states for AgBr 167

EELS
Electron energy loss and X-ray photoelectron spectra. Part 2. Phthalocyanine and its Ni, Cu and Co derivatives in their alpha-form 155
Electron energy loss and X-ray photoelectron spectroscopic studies of $NbSE_3$ 171
Electron energy-loss spectra of toluene and xylenes 341
On the origin of temperature effects in the photoemission spectra of NiO 267
Electronic structure
Electron structure of ferrocene derivatives 419
Energy-resolved
Ultraviolet photoelectron spectroscopy with energy-resolved imaging 311
EPMA
Interference of Ag L radiation in the XPS of Si and Au using an Al/Mg twin anode 283

Extra-atomic relaxation
Extra-atomic relaxation in surface systems 355

Ferrocene
Electron structure of ferrocene derivatives 419
Lifetimes of molecular negative ions of ferrocene derivatives 431
FWHM
Partial densities of valence states for AgBr 167
XPS studies of oxodic model catalysts: internal standards and oxidation numbers 91

Ghost peak
Interference of Ag L radiation in the XPS of Si and Au using an Al/Mg twin anode 283
Group IIa
Electrostatic and chemical bonding contributions to the cation core level binding energy shifts in MgO, CaO, SrO, BaO. A cluster model study 189

HDPE
Accurate determination of Auger line shape binding energies 117
High resolution
High resolution monochromated X-ray photoelectron spectroscopy (XPS) studies on novel biodegradable poly(ortho esters) prepared using *N*-methyl- and *N*-phenyldiethanolamine, correlated with binding energies obtained from ab initio molecular orbital methods 221
HTSC
Quantitative XPS analysis of high T_c superconductor surfaces 131
Hydrogen fluoride
Rotational analysis of the He I photoelectron spectrum of HF 11

ICES
Calibration of electron spectrometers by using ^{99m}Tc internal conversion electron sources 31
Instrument
Calibration of electron spectrometers by using ^{99m}Tc internal conversion electron sources 31
Interface
Fe/Cr(111) interface formation investigated by synchrotron radiation-induced photoemission 207
Ion implantation
X-ray photoelectron spectroscopy of calcium-ion-implanted titanium 347
IR-ATR
XPS study of polymer chain conformation in amorphous and crystalline poly(ethylene terephthalate) samples 53
Isomer
Observation of many-body states in the valence shells of *cis*-, *trans*- and isodichloroethylene by synchrotron radiation photoelectron spectroscopy at 120 eV 75

LDPE
Accurate determination of Auger line shape binding energies 117
Linear momentum conservation
The velocity distribution of photoelectrons at threshold derived from classical linear momentum conservation 177
LPCVD
X-ray photoelectron spectroscopy characteristics of the W/TiN/Si and W/TiN/SiO_2/Si structures 145
LPFS
Rotational analysis of the He I photoelectron spectrum of HF 11

Madelung
Electrostatic and chemical bonding contributions to the cation core level binding energy shifts in MgO, CaO, SrO, BaO. A cluster model study 189
Many-body state
Observation of many-body states in the valence shells of *cis*-, *trans*- and isodichloroethylene by synchrotron radiation photoelectron spectroscopy at 120 eV 75

MCSCF
Experimental and theoretical study of the XPS core levels of gas phase acetonitrile, acrylonitrile and propionitrile. Model molecules for polyacrylonitrile 239
MDE
High resolution monochromated X-ray photoelectron spectroscopy (XPS) studies on novel biodegradable poly(ortho esters) prepared using *N*-methyl- and *N*-phenyldiethanolamine, correlated with binding energies obtained from ab initio molecular orbital methods 221
Metallocene
Electron structure of ferrocene derivatives 419
Lifetimes of molecular negative ions of ferrocene derivatives 431
Mica
XPS study of mica surfaces 289
Mixed oxide
X-ray photoelectron spectroscopy of calcium-ion-implanted titanium 347
Model
Accurate determination of Auger line shape binding energies 117
Investigation of concentration depth profiles by means of angle-resolved XPS: a polynomial model 43
Lifetimes of molecular negative ions of ferrocene derivatives 431
XPS study of polymer chain conformation in amorphous and crystalline poly(ethylene terephthalate) samples 53
Molecular ion
Lifetimes of molecular negative ions of ferrocene derivates 431
MP2
Experimental and theoretical study of the XPS core levels of gas phase acetonitrile, acrylonitrile and propionitrile. Model molecules for polyacrylonitrile 239

Nickel oxide
On the origin of temperature effects in the photoemission spectra of NiO 267
Novel
Real-time investigation of aerosol particle beams using X-ray photoemission spectroscopy 327
Ultraviolet photoelectron spectroscopy with energy-resolved imaging 311

OES
Rotational analysis of the He I photoelectron spectrum of HF 11
Organometallic
Electron structure of ferrocene derivatives 419
Lifetimes of molecular negative ions of ferrocene derivatives 431
Orientation
XPS investigations of acid–base interactions in adhesion. Part 3. Evidence for orientation of carbonyl groups from poly(methylmethacrylate) (PMMA) at the PMMA–glass and PMMA–SiO_2 interfaces 393
Oxidation number
XPS studies of oxidic model catalysts: internal standards and oxidation numbers 91
Oxide
X-ray photoelectron spectroscopy of calcium-ion-implanted titanium 347

PDE
High resolution monochromated X-ray photoelectron spectroscopy (XPS) studies on novel biodegradable poly(ortho esters) prepared using Nmethyl- and *N*-phenyldiethanolamine, correlated with binding energies obtained from ab initio molecular orbital methods 221
Pd(100)
Extra-atomic relaxation in surface systems 355
Pd(110)
Extra-atomic relaxation in surface systems 355
Pd(111)
Extra-atomic relaxation in surface systems 355

PES
An angle-resolving cylindrical mirror analyser for measurements of photo- and Auger electrons 379
Electron structure of ferrocene derivatives 419
Electronic structure of thiophenes with mixed substituents 85
Observation of many-body states in the valence shells of *cis*-, *trans*- and isodichloroethylene by synchrotron radiation photoelectron spectroscopy at 120 eV 75
Relativistic calculations of photoelectron and conversion-electron spectra for UF_4 409
Rotational analysis of the He I photoelectron spectrum of HF 11
PET
XPS study of polymer chain conformation in amorphous and crystalline poly(ethylene terephthalate) samples 53
Phthalocyanine
Electron energy loss and X-ray photoelectron spectra. Part 2. Phthalocyanine and its Ni, Cu and Co derivatives in their alpha-form 155
Plasmon
Electron energy loss and X-ray photoelectron spectroscopic studies of $NbSe_3$ 171
PMMA
XPS investigations of acid–base interactions in adhesion. Part 3. Evidence for orientation of carbonyl groups from poly(methylmethacrylate) (PMMA) at the PMMA–glass and PMMA–SiO_2 interfaces 393
Polymer
Experimental and theoretical study of the XPS core levels of gas phase acetonitrile, acrylonitrile and propionitrile. Model molecules for polyacrylonitrile 239
High resolution monochromated X-ray photoelectron spectroscopy (XPS) studies on novel biodegradable poly(ortho esters) prepared using *N*-methyl- and *N*-phenyldiethanolamine, correlated with binding energies obtained from ab initio molecular orbital methods 221
XPS study of polymer chain conformation in amorphous and crystalline poly(ethylene terephthalate) samples 53
Polynomial
Investigation of concentration depth profiles by means of angle-rsolved XPS: a polynomial model 43
Resolution
An angle-resolving cylindrical mirror analyser for measurements of photo- and Auger electrons 379
SCF
Experimental and theoretical study of the XPS core levels of gas phase acetonitrile, acrylonitrile and propionitrile. Model molecules for polyacrylonitrile 239
Observation of many-body states in the valence shells of *cis*-, *trans*- and isodichloroethylene by synchrotron radiation photoelectron spectroscopy at 120 eV 75
Semiconductor
Electron energy loss and X-ray photoelectron spectra. Part 2. Phthalocyanine and its Ni, Cu and Co derivatives in their alpha-form 155
Sensitivity
Real-time investigation of aerosol particle beams using X-ray photoemission spectroscopy 327
Silica
X-ray photoelectron spectroscopy characteristics of the W/TiN/Si and W/TiN/SiO_2/Si structures 145
Silicon
X-ray photoelectron spectroscopy characteristics of the W/TiN/Si and W/TiN/SiO_2/Si structures 145
Silver bromide
Partial densities of valence states for AgBr 167
Spectrometer
Calibration of electron spectrometers

by using ^{99m}Tc internal conversion electron sources 31
SRIPS
Fe/Cr(111) interface formation investigated by synchrotron radiation-induced photoemission 207
Stoichiometry
On the origin of temperature effects in the photoemission spectra of NiO 267
Superconductor
Quantitative XPS analysis of high T_c superconductor surfaces 131
Surface charging
XPS study of mica surfaces 289
Synchrotron radiation
Fe/Cr(111) interface formation investigated by synchrotron radiation-induced photoemission 207

Temperature effect
On the origin of temperature effects in the photoemission spectra of NiO 267
Thiophene
Electronic structure of thiophenes with mixed substituents 85
Threshold
The velocity distribution of photoelectrons at threshold derived from classical linear momentum conservation 177
Titanium
X-ray photoelectron spectroscopy of calcium-ion-implanted titanium 347
Titanium nitride
X-ray photoelectron spectroscopy characteristics of the W/TiN/Si and W/TiN/SiO_2/Si structures 145
Toluene
Electron energy-loss spectra of toluene and xylenes 341
TPES
Rotational analysis of the HeI photoelectron spectrum of HF 11
Transition metal compound
Electron energy loss and X-ray photoelectron spectroscopic studies of NbSe3 171
Tungsten
X-ray photoelectron spectroscopy characteristics of the W/TiN/Si and W/TiN/SiO_2/Si structures 145
Twin anode
Interference of Ag L radiation in the XPS of Si and Au using an Al/Mg twin anode 283

UHV
Fe/Cr(111) interface formation investigated by synchrotron radiation-induced photoemission 207
On the origin of temperature effects in the photoemission spectra of NiO 267
XPS study of mica surfaces 289
UPS
Inelastic electron background function for ultraviolet photoelectron spectra 253
On the origin of temperature effects in the photoemission spectra of NiO 267
Partial densities of valence states for AgBr 167
Ultraviolet photoelectron spectroscopy with energy-resolved imaging 311
Uranium fluoride
Relativistic calculations of photoelectron and conversion-electron spectra for UF_4 409

Velocity distribution
The velocity distribution of photoelectrons at threshold derived from classical linear momentum conservation 177

XPS
An XPS study of yttria-stabilised zirconia single crystals 1
Calibration of electron spectrometers by using ^{99m}Tc internal conversion electron sources 31
Electron energy loss and X-ray photoelectron spectra. Part 2. Phthalocyanine and its Ni, Cu and Co derivatives in their alpha-form 155
Electron energy loss and X-ray photoelectron spectroscopic studies of $NbSe_3$ 171
Experimental and theoretical study of the XPS core levels of gas phase aceto-

nitrile, acrylonitrile and propionitrile. Model molecules for polyacrylonitrile 239
High resolution monochromated X-ray photoelectron spectroscopy (XPS) studies on novel biodegradable poly(ortho esters) prepared using *N*-methyl- and *N*-phenyldiethanolamine, correlated with binding energies obtained from ab initio molecular orbital methods 221
Interference of Ag L radiation in the XPS of Si and Au using an Al/Mg twin anode 283
Investigation of concentration depth profiles by means of angle-resolved XPS: a polynomial model 43
Quantitative XPS analysis of high T_c superconductor surfaces 131
Real-time investigation of aerosol particle beams using X-ray photoemission spectroscopy 327
X-ray photoelectron spectroscopy characteristics of the W/TiN/Si and W/TiN/SiO_2/Si structures 145
X-ray photoelectron spectroscopy of calcium-ion-implanted titanium 347
XPS investigations of acid–base interactions in adhesion. Part 3. Evidence for orientation of carbonyl groups from poly(methylmethacrylate) (PMMA) at the PMMA–glass and PMMA–SiO_2 interfaces 393
XPS studies of oxidic model catalysts: internal standards and oxidation numbers 91
XPS study of mica surfaces 289
XPS study of polymer chain conformation in amorphous and crystalline poly(ethylene terephthalate) samples 53

Xylene
Electron energy-loss spectra of toluene and xylenes 341

YSZ
An XPS study of yttria-stabilised zirconia single crystals 1

Yttria
An XPS study of yttria-stabilised zirconia single crystals 1

ZEKE
The velocity distribution of photoelectrons at threshold derived from classical linear momentum conservation 177

Zirconia
An XPS study of yttria-stabilised zirconia single crystals 1
